

SAME SACRAMENTO POST PRESENTS

PFAS: UNDERSTANDING EMERGING ISSUES WITH THESE WIDESPREAD COMPOUNDS TUESDAY, JULY 23, 2019

11:30 AM TO 1:00 PM (PROGRAM STARTS AT NOON)

TOPIC:

The subject of Per- and Poly-Fluoroalkyl Substances (PFAS) can be confusing with the surge of new information and is a source of concern across the environmental industry. Many states have put new guidelines and regulations in place for managing PFAS risks, and the U.S. EPA will likely act soon. In today's uncertain regulatory environment, what do environmental professionals need to be aware of to cut through the hype and confusion and understand the fundamentals of what this family of chemicals is about? This presentation will help cut through the clutter and discuss the fundamentals of PFAS characteristics and their impact on the environment.

SPEAKER: Amy Wilson, PhD, TRC Inc.

LOCATION:

The Old Spaghetti Factory - 1910 J St, Sacramento, CA 95811

LUNCH PROVIDED:

Lunch options provided by the Old Spaghetti Factory are:

TRC is a global consulting firm providing environmentally conscious solutions powered by the latest technology. From pipelines to power plants, city streets to schoolyards, clients turn to TRC for breakthrough thinking backed by the steadfast follow-through of a 50-year industry leader. Today we offer groundbreaking yet grounded business consulting and applied technology that help our clients design, power, connect and fuel the world forward. We are more than 5,000 technical professionals and support personnel serving 140 offices throughout the U.S., U.K., Canada and China. Our operating sectors consist of power and utilities, oil and gas, transportation, and environmental. In Southern California, TRC is the designer-builder for the \$100 million Cal Compact Landfill redevelopment project in which a shopping mall will be built on over 2,000 piers driven through waste and protected by an innovative capping and gas control system.
